Mwithalie Pinidy Mwendia

SOFTWARE ENGINEERING STUDENT | FOUNDER, NEXTGEN SYSTEMS

Meru, Kenya | 0741 189 878 | pinidymwendia8@gmail.com
github.com/Pmemphis | NextGen Systems website | PesaTrack

PROFILE

Fourth-year Software Engineering student at Kirinyaga University and founder of a student-led software venture. Builds practical applications for personal finance, financial reconciliation, schools, retail, and online business. Hands-on experience with React, Django, PostgreSQL, and Microsoft Dynamics 365 Business Central with AL.

EDUCATION

Kirinyaga University

Software Engineering | Fourth-year student | Expected graduation: September 2027

EXPERIENCE

Founder and CEO | NextGen Systems

Student-led software venture | Meru, Kenya | Current

- Founded and currently lead a software venture developing practical systems for education, retail, and small businesses.
- Designed and built a portfolio that includes a school MIS, two POS systems, an e-commerce website, PesaTrack, NextGen Reconcile, and the company website.
- Built PesaTrack, now used by friends for personal income, expense, budget, and savings tracking; one POS solution is used day to day by a customer.

Software Engineering Attachee | AppKings

May 2025 - July 2025 | Three-month attachment

- Completed training in Microsoft Dynamics 365 Business Central and used AL language in the Business Central environment.

SELECTED PROJECTS

PesaTrack | Personal finance management application
Helps users track income and expenses, manage budgets, monitor savings, and review their financial position through a centralized dashboard. Hosted and in use by friends. Stack: React, Django, PostgreSQL.

NextGen Reconcile | Financial reconciliation SaaS
Helps Kenyan SMEs compare bank, M-Pesa, and accounting records to identify missing transactions, duplicate payments, and discrepancies. Completed; not yet hosted. Stack: React, Django, PostgreSQL.

NextGen POS solutions | Point-of-sale systems
Built two POS systems. One is used day to day by a customer; NextGen UltraPOS is presented on the company product site.

School MIS and e-commerce website
Completed software projects for school information management and online commerce; not yet hosted.

NextGen Systems website
Built the live company website presenting software products and services for schools, retailers, and growing businesses.
